A Comprehensive Application to Manage Your Fleet

CyntrX[®] gives you the ability to create, view, edit, sign, print and email logs and inspection reports in compliance with all FMCSA guidelines—right from a smartphone or tablet. Our solution is fully compliant with existing regulations and will remain a compliant solution as the industry transitions to ELD.

DRIVER APPLICATION

- Simple application download and setup
- Electronic log stays with the driver
- Application synchronizes with the vehicle
- Real-time Internet backup protects driver history
- Visually displays logs for roadside inspections per FMCSA Reg 395.15 for “in-cab displays”
- DVIR—inspection process identifies the defect and ensures that the repair has been completed

Fleet Manager Benefits

Historically, hours-of-service is the most frequently cited violation during roadside inspections. The CyntrX HOS solution provides **automatic updates to fleet managers** with duty status, driving time and remaining hours of service. Let CyntrX ensure that your fleet is compliant with the latest ELD regulations by automating your driver's logs and vehicle inspections.

- CyntrX eLog HOS/DVIR software is integrated with vehicle trip records
- Reporting follows FMCSA rules and regulations
- Compliant with the electronic recorder rules for HOS compliance

- Significantly reduces the time it takes to generate driver logs
- Show up-to-date logbooks to law enforcement and DOT
- Less paperwork and accuracy of records for roadside inspections
- Helps to improve your HOS CSA scores by managing and coaching drivers

- CyntrX connects to the vehicle's engine through industry standard diagnostic connections
- All trip and driver data is stored on the device and Cloud servers up to 30 days

- Drivers and fleet managers share the same real-time Trip and Driver data
- eLog application supports team driving and over 25 driving rules
