

WHAT IS THE SPEEDGAUGE SAFETY CENTER?

Are you concerned about vehicles speeding on highways, and side roads? In yards and terminals?

The SpeedGauge Safety Center offers a one-stop solution to begin managing speed - and saving money - everywhere your fleet operates. With SpeedGauge reports, charts, alerts and maps, you have access to all of the information needed to control speeding in your fleet!

HOW IT WORKS

- Uses the data already collected from your vehicles by CyntrX
- Monitors violations of the posted speed limit across all road networks
- Also monitors speed according to custom speed limits that you control, and in special geofence zones both inside and out of the ordinary road network

WHAT IT DOES

- See when and where drivers are speeding
- Use SpeedGauge coaching tools to improve driver performance
- Watch your fleet's speeding trends improve over time
- Eliminate safety risk and unnecessary traffic stops
- Boost CSA scores by reducing speeding violations

SPEED MATTERS

REDUCE SPEED. REDUCE RISK. SAVE MONEY. SAVE LIVES.

"**SpeedGauge** is not about punishing or spying on drivers ... reports allow us to identify habitual speeders in our organization and enable 1-on-1 discussion with these drivers.

-- Paul Schmitz and David Viessman
Cliff Viessman, Inc., Gary, South Dakota

SUPPORT

SpeedGauge is more than just a piece of software - it's a driver coaching and performance management system - and part of that system is our world-class support, training and consulting service. Our Safety Center Specialists will show you how to use *SpeedGauge* to get the insight you need to bring your speeding down and your safety up.
